

CHOOSING THE RIGHT MAT

Your selection should be determined by the optimum combination of comfort, drainage and quality.

Comfort

- Generally thicker mats are more comfortable.
- 7/8" mats are best where workers remain for a full shift.
- 1/2" mats are excellent for extended use work stations.
- 3/8" mats are best for traffic areas.

Drainage

- In areas of frequent spills and standing water:
 - Use a full-drainage mat.
- In drier work and traffic areas:
 - A mat that offers moderate drainage is adequate.

Quality

Grease and oil break down mats and shorten service life. Red matting is formulated and designed to withstand greater protection to grease and oil – the primary contributor to rubber deterioration.

Location & Mat Recommendation

	LOCATION	RECOMMENDATION	DESCRIPTION
1	Cooking Line	San EZE II Red, Tek-Tough Red, Optimat Red, Optimat Brown, Tek-Tough Jr. Red, Super Flow Red	Grease-proof rubber with ergonomic comfort and traction in wet or greasy areas
2	Carving Station	San EZE Black, Tek-Tough Black, Tek-Tough Jr. Black, Super Flow Black	Flexible configurations, some exposure to grease, oil & water, drainage, and comfort
3	Dishwasher/Pot Scrub	Tek-Tough Black, Tek-Tough Jr. Black, Super Flow Black	Heavy duty rubber makes these mats a good economical choice- provides excellent drainage
4	Dessert Bar	Optimat Brown, Tek-Tough Jr. Black, Super Flow Black	Beveled edge and rubber surface make cart access easy
5	Bar	Tek-Tough Jr. Black, Grip True Black, Super Foam, Tek-Tough Black	Drainage, anti-slip, and comfort
6	Waitperson Station	Super Flow Black, Tek-Tough Jr. Black, Comfort Rest	Provides excellent coverage and supports fatigue relief
7	Walk-in Freezers & Coolers	Deep Freeze Mat, Multi Mat II	Cold temperatures will not affect rubber
8	Receiving	Multi Mat II, Grip True	Assist in prevention of slips and falls — sure traction design keeps mat firm in place
9	Cash Register	Superfoam, Marble Tuff, Comfort Rest	Makes standing more comfortable — Ideal for dry areas and work stations
10	Foyer	Atlantic Olefin, Bristol Ridge, Water Master	Perfect for placement inside entrances
11	Entrance	Ridge Scraper, Water Master, Finger Scape	Helps keep mud and dirt outside — excellent water absorption
12	Dining or Kitchen Entrance	Atlantic Olefin, Bristol Ridge, Water Master	Durable matting designed with low profile for door clearance / cart traffic
